## Annexure A – Lifting Fees

### Item 7 of the Schedule

See attached.

## Appendix 1 – Customer Safety & Environmental Requirements

This Safety & Environmental document applies to any vessel owner, vessel manager or representative, tenant, contractor and their staff who conducts works in any communal work areas located across the GCCM Marina's site.

The Gold Coast City Marina is committed to ensuring the health and safety of everyone on site. Our goal is simple. No harm to anyone, at any time, as a result of the work performed across the site.

To achieve this, everyone needs to play their part by ensuring that they comply with the requirements of all Queensland work health and safety laws, regulations and approved codes of practice, as well as the GCCM site rules, the site code of conduct, site environmental policy, the information that is provided in this listing and hardstand service agreement and other communications that are forwarded to customers from time to time.

For those undertaking works in communal areas – sheds, hardstands, front/back areas of tenancies – the following additional requirements apply at all times:

- When a vessel is placed on a support system by GCCM (props, braces, cradles etc.) it must not be altered in any way. The GCCM operations team are the only persons authorised to do this. If the load of the vessel is expected to change by 200kg for vessels under 5t or 2t for vessels on the hardstand you must arrange for the GCCM operations team to assess the system first to ensure lateral stability is maintained.
- All electrical leads used to access power need to be IP56 rated and show a current test and tag label.
- All persons engaged to undertake refit, maintenance or repair work on the GCCM site need to complete the GCCM Site Induction 48 hours prior to entering the GCCM Complex and provide evidence of applicable insurances, licences and safe systems of work. Please visit [gccm.com.au](http://gccm.com.au) – Marine Trades Directory – GCCM Site Induction to complete the GCCM Site Induction Requirements.
- All **electrical equipment** (i.e. tools, electrical cords, distribution boxes etc.) must have a current test and tag as required by law.
- All work areas must be kept clean and free of any hazards and risks that may cause injury, illness or property damage.
- You must ensure that our local **environment** (waterways, air, the site, etc.) is not negatively impacted as a result of the works that you perform. This includes:
  - Using products (e.g. paints, solvents, chemicals etc.) that are less toxic where possible
  - Ensuring that appropriate spill prevention and containment measures are in place
  - Using dust/extraction systems when sanding or spraying
  - Ensuring that no contaminants are washed into our local waterways.
- To prevent fire and explosion risks from sources of flames, sparks and heat (e.g., grinding, welding, oxycutting, etc.) flammable or combustible chemicals, materials and vapours must be isolated from the work area. Controls such as ventilation systems, spark/flash screens and firefighting equipment is to be in place.
