

Murcielago selected Gold Coast City Marina and Shipyard (GCCM) to give the yacht a whole new lease of life.

'MY MURCIELAGO'

23m Sunseeker

WORKS COMPLETED

Twin Disc removed the yacht's triple Arneson surface drive propulsion system then took them to their workshop to rebuild them. The surface drives returned as new. Meanwhile, the yacht required its majestic and striking black hull to be renewed and the Owner selected a vinyl wrap. To wrap the hull, first the yacht stripped, repaired, faired, bogged and then primed by Total Refinishing before the vinyl was adhered. All the hardware was removed and refurbished from the bulwarks down and successfully reattached to post wrap. It was also an opportunity to complete touch up to silver paint work on the topsides as well as the non-skid was also completed by Total Refinishing.

THE RESULTS

The timeframe for the works to be completed was tight. GCCM and the team of contractors were super efficient in receiving Murcielago, lifting her onto the hardstand and moving her into one of the fully enclosed painting sheds. Works up to date have all been done within scheduled time which shows the efficiency of the yard.

CAPTAIN'S REVIEW

THE RESULTS

Yacht Name:

MY MURCIELAGO

Builder: Sunseeker

Yacht LOA (m): 23m

Launch Year: 2003

Hull Construction: Fibreglass

Survey Standard:

Malta Commercial

Project Goal:

Wrap the yacht and rebuild the propulsion system.

Project Timeframe:

2 months

CAPTAIN'S REVIEW

'MY MURCIELAGO'

23m Sunseeker

"We have spent significant time on the yard and in the refit sheds at GCCM. What has impressed me the most has been the flexibility, professionalism and accomodating nature of the yard staff and contractors. It has allowed us to complete an extensive list of works as efficiently as possible. I will definitely be bringing the boat here every year for all the works needed. Thank you for making our experience as productive and painless as possible."
